

What is ClearCorrect?

ClearCorrect is the clear and simple alternative to braces. No wires. No brackets. No reason not to smile. Just a series of clear, custom, removable aligners that gradually straighten your teeth as you wear them, each aligner moving your teeth just a little bit at a time.

How Does it Work?

The process starts with your dentist who takes your impressions, x-rays, and photos, and sends them in with a prescription form. ClearCorrect manufactures your aligners per the precise instructions provided and then sends them back to your dentist.

Once your dentist receives your new ClearCorrect aligners, the process is simple:

Let's say these lines are your teeth. You wear your first aligner and it moves them a little bit.

Then you wear your next aligner and it moves them a little bit more.

You continue wearing your aligners under the supervision of your dentist and you eventually get straight teeth.

Is it right for you?

Your lifestyle is important to you and so is your smile. So why should one cost you the other?

With ClearCorrect, it doesn't have to.

ClearCorrect is practically invisible—most people won't even notice you're in treatment. It's comfortable—no cuts or scrapes like with braces. It's removable—eat what you want, then brush and floss. It's flexible—schedule appointments to fit your life. It's affordable—comparable to braces, even less than other treatment options.

Compare ClearCorrect

Treatment Option:	ClearCorrect	Other Aligners	Metal Braces
Clarity:	●	◐	○
Hygiene:	●	◐	○
Control:	●	◐	●
Results:	●	◐	●

ClearCorrect has the advantages of braces without the limitations of other aligner systems. It's clearer and easier to keep clean, with better control for your dentist and better results for you.
